

CENTRAL REGISTRY OF SECURITISATION ASSET RECONSTRUCTION AND SECURITY INTEREST OF INDIA (CERSAI)

CERSAI/2023-24/4838.

Date – 31.01.2024

The Nodal Officer/Admin Officer,
Of Reporting Entities in CKYCRR

Dear Sir/Madam,

Sub : - Rejection in upload of KYC records due to mismatch of PIN Code and other matters.

Issue 1 -

Reporting Entities(REs) have been facing difficulties related to mismatches in PIN codes in records uploaded and the PIN code master used by CKYCR registry as a result of which the records get rejected. This matter is being raised by many REs and discussed in the awareness meetings conducted by CERSAI. The matter is persisting and causes inconvenience to the customers of RE due to rejection of KYC records. The issue has been discussed extensively and points as below have emerged from the discussions and have been explained with illustrations :-

CKYCRR uses the source .csv file downloaded from India Post to update pin code master and updates its pin code master once every six months. Modifying it more frequently will be a cumbersome process for registered entities as they usually request a notice period of 3 weeks to deploy the updated master in their systems. Failure to update their master as per CKYCRR master, will result in a large number of records of the reporting entities getting rejected at the time of upload.

The CKYC master only contains pin codes that have a unique district-state combination tagged to it which facilitates the auto-population of district and state when a pin code is input at the time of upload/update. In case the pin code has multiple districts or states tagged to it, it is not included in the master. This enables the user to input any valid district-state combination against such pin codes. For example, pin code 247775 as per India Post (data.gov.in) has the following district-state combinations against it:

Pin code	District	State
247775	SHAMLI	UTTAR PRADESH
247775	MUZAFFARNAGAR	UTTAR PRADESH

To facilitate the user to choose between the two district- state combination, the pin code 247775 is not made available in our pin code master. This means, when the user is uploading a record, they may input the pin code 247775, and input either SHAMLI or MUZAFFARNAGAR as district and UP as state code.

Now let us consider a pin code such as 400051 which is present in our pin code master. This pin code has only the following district-state combination tagged to it in India Post:

Pin code	District	State
400051	Mumbai Suburban	Maharashtra

Since this entry is there in our master, it is mandatory for the user to provide the combination "400051, Mumbai Suburban, MH" when uploading the record.

Few probable solutions to the issues pertaining to the sample pin codes are as under: -

PIN Code	District as per India Post	How to input pin code in CKYCRR
440009	NA	Input pin code, enter required district-state combination as per CKYC district master - 'Nagpur-MH'
247775	SHAMLI MUZAFFARNAGAR	Explained above
500016	Hyderabad MEDCHAL MALKAJGIRI	Similar to '247775'

*REs can reduce the rejection of uploaded records caused due to the PIN Code mismatch by ensuring at the initial stage of establishing account based relationship that the PIN Code in the OVDs submitted by their customer match the PIN Code master provided and used by CKYC.

You are required to follow the process as explained above while uploading data of customers.

Issue 2 -

The registration process followed in the CKYCR registry requires one Nodal Officer and two Admin Officers initially to enable the Financial Institution (FI) to onboard on the CKYCR portal. Any changes in the appointment of the nodal/admin officer in the FI should invariably be updated on the CKYCR portal by following the procedure as described in the user manual available under downloads section on the CKYCR Registry so that you do not miss any communication from CERSAI/CKYC.

You are requested to check details of nodal officer of your organization and make changes if required.

Yours Sincerely

Anuj Sinha 31/01/2024
