## CENTRAL KYC RECORDS REGISTRY OPERATING GUIDELINES

---

The Government of India vide their Notification dated November 26, 2015 authorized the Central Registry of Securitisation Asset Reconstruction and Security Interest of India (CERSAI), set up under sub-section (1) of Section 20 of the Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (54 of 2002), to act as and to perform the functions of the Central KYC Records Registry under the said rules, including receiving, storing, safeguarding and retrieving the KYC records in digital form of a “client”, as defined in clause (ha) of sub-section (1) of Section 2 of the Prevention of Money-Laundering Act, 2002. The Central Government have also amended the Prevention of Money-laundering (Maintenance of Records) Rules, 2005 vide Notification dated July 07, 2015 for the purpose of establishment of Central KYC Records Registry.

### I. Definitions

---

In these guidelines, unless the context otherwise requires, the terms defined herein shall bear the meanings assigned to them below –

- A. “Act” means the Prevention of Money Laundering Act, 2002.
- B. “Rules” means Prevention of Money Laundering (Maintenance of Records) Rules, 2005.
- C. “Central KYC Records Registry” (CKYCRR) means a reporting entity defined under 2(1) - (ac) of the Rules.
- D. “Reporting Entity” means an entity defined under clause (wa) of sub- section (1) of section 2 of the Act.
- E. Customer means a “Client” as defined under clause (ha) of sub-section (1) of section 2 of the Act.
- F. “KYC” means the due diligence procedure prescribed by the regulator for identifying and verifying the proof of address, proof of identity and compliance with rules, regulations, guidelines and circulars issued by the regulator or any

other statutory authority under the Act from time to time. “KYC identifier” means a unique identifier for the customer generated by the Central KYC Records Registry and notified to the reporting entities (REs).

- G. Regulator in consultation with the Central Govt and the Central KYC Records Registry may issue guidelines to be followed by RE’s for filing, retrieval, and utilization of KYC records with CKYCRR. All other words and expressions used but not defined in these guidelines shall have the same meaning as have been assigned to them under the Act or the Prevention of Money laundering (Maintenance of Records) Rules, 2005 or any statutory modification or re-enactment thereto, as the case may be.

## II. Overview of the role of CKYCRR in the KYC process

The objective of setting up the CKYCRR was to have a Centralized Repository of KYC records of customers in the financial sector (across the Regulated Entities of all the Financial Sector Regulators viz RBI ,SEBI, IRDAI, PFRDA & **IFSCA**) with uniform KYC norms and inter-usability of KYC records across the financial sector to reduce the burden of producing KYC documents and getting those verified any time when the customer creates a new financial relationship with a financial entity.

Post generation of KYC Identifier, customer can carry his KYC identifier to any other RE for completing KYC formalities while opening account.

Since the operationalization of CKYCRR, clients need to submit their KYC details only once with any of the reporting entities of RBI, SEBI, IRDAI, PFRDA and **IFSCA** at the time of account opening. Thereafter, they are assigned a unique CKYC Identifier which can be used by the client when they are establishing an account-based engagement with any other reporting entity. There will be no need for reporting entities to repeat the KYC process in case the client's KYC record is already registered with CKYCRR, as the KYC record can be easily retrieved in an electronic format from the Registry.

When the customer approaches the reporting entity, the following steps can be used to perform seamless account opening using the KYC record from CKYCRR.

## Step 1 and 2: Search and Download

---

The CKYC Search function allows the reporting entities to check if a KYC record is already registered on CKYCRR. The search may be performed on the basis of the 14- digit CKYC identifier or a valid ID number of an Officially Valid Document (OVD).

### CKYC Search API service

The best method of integrating CKYC search with the customer onboarding journey is by using the CKYC Search API service. Reporting entities may directly query the CKYC database from their onboarding application using this API and integrate the KYC data received from CKYC into the onboarding journey on a real time basis.

A few noteworthy traits of the CKYC APIs are as follows:

- 1) The average CKYC search response time is 0.2 seconds
- 2) A single IP address can send up to 20 requests per second

- 3) The CKYC search response contains the Name, Age, Photo, List of OVDs present in the KYC record, last updated date and the create date of the KYC record.

The system design can leverage the quick CKYC response time and the innate flexibility of API, in a manner that allows the user to input multiple search parameters in a single request through their application front end and with a single click trigger multiple search API requests to CKYCRR at the back end. The system will consolidate multiple responses received into a single view for the user having submitted a single request and receiving a real time response for the same. The system can be further enhanced to automatically download the KYC record without the user having to give further instructions or ‘clicks’.

Designing the system using this approach will lead to a significant change in the way information is sought from the customers at branches for KYC search. Customers may provide all the relevant information at one time rather than in piecemeal which is more convenient and efficient thereby reducing the overall turnaround time of the entire onboarding process.

Customers may also be encouraged by branch staff to search for their CKYC number before the onboarding process is initiated by using the ‘Missed call’, ‘View your card’ and Digi-locker services hosted by CKYCRR.

#### Bulk Search using SFTP

To simplify back-end processes (where REs are yet to integrate their backend operations with CKYC APIs), REs may submit multiple search requests using different search criteria for the same customer in a single search file.

If the KYC record is already registered in CKYCRR, then the reporting entity can retrieve the KYC records online from the CKYCRR by using the CKYC Download function. The client is not required to submit the same KYC documents or information or any other additional identification documents or details, unless the KYC record requires to be modified due to some change in the information of the

client and/or the reporting entity considers it necessary for enhanced due diligence.

To enhance data security, the KYC Identifier shall only be available to registered reporting entities (REs) when the KYC record is successfully downloaded from CKYCRR using an authentication factor. In the KYC search response and confirmed match responses received during the new KYC record generation (KYC Upload) process, the KYC identifier shall be masked, and a CKYC reference ID that is unique to each KYC identifier shall be provided. REs shall be able to download KYC records using either the KYC identifier or CKYC reference ID.

## Step 3: Update

---

In case of changes or differences in the details of a client available in the KYC record, then the reporting entity shall initiate a CKYC Update request in CKYCRR. To initiate an update request, the reporting entity will need to have the latest KYC record of the customer.

When a record is updated, all the institutions linked\* to the KYC record in CKYCRR will be notified through a system report of the update to the KYC record.

(\* Reporting entities who have either uploaded or downloaded a record in CKYCRR are considered to have an account-based relationship with the client and are therefore linked to the KYC.)

## Update Notification

---

When a KYC record is updated in CKYCRR, all reporting entities that have previously uploaded or downloaded the KYC record for that customer shall receive an electronic notification of the update. These reporting entities shall download the KYC record from CKYCRR to obtain the latest KYC record of their clients.

## Upload of KYC records that are not registered in CKYCRR

---

The reporting entities shall use the CKYC Upload function to register the CKYC record in CKYCRR where the client's record is not available in the Registry.

Post the generation of the CKYC identifier, the reporting entity shall communicate the same to the client in writing.

## III. Functions and Obligations of Central KYC Records Registry

---

The Central KYC Records Registry has the following functions and obligations:

- A. Shall have secure electronic connectivity with the registered reporting entities.  
The web address of Central KYC Records Registry portal is <https://www.ckycindia.in>
- B. Shall have a secure data transmission link with the ID issuing authorities wherever feasible and use such electronic data, as permitted, and preserve it with the Central KYC Records Registry.
- C. Shall be responsible for electronically (i) storing (ii) safeguarding and (iii) retrieving the Know Your Customer (KYC) records and making such records available online to reporting entities or Director.
- D. Information updated about a customer shall be disseminated by Central KYC Records Registry to any reporting entity that avails the services of the Central KYC Records Registry in respect of the customer.
- E. The records can be fetched from Central KYC Records Registry on payment of prescribed fee, in advance. Incentives for upload and update of KYC records shall be paid quarterly to the reporting entities, based on the monthly invoices they submit.
- F. Shall process the KYC records received from a reporting entity for de- duplication and issue a unique KYC Identifier for each client to the reporting entity.

- G. Ensure that the integrity of the electronic systems for records is maintained and accessible at all material times.
- H. Take all necessary precautions to ensure that the electronic Know Your Customer (KYC) records are not lost, destroyed or tampered with and that sufficient back up of electronic records is always available at a different place.
- I. Take all reasonable measures to prevent unauthorized access to its KYC database.

## IV. Functions and obligations of the reporting entity

---

The reporting entity shall have the following functions and obligations:

- A. Reporting entities shall be required to register with the Central KYC Records Registry in accordance with the processes and instructions issued.
- B. While commencing an account-based relationship, the reporting entity shall verify the identity of the customer and perform the initial due diligence of the customer.
- C. The prescribed fee is payable by the reporting entity for each type of transaction and Central KYC Records Registry will collect such fees from the reporting entities, in advance.
- D. As per Prevention of Money-laundering (Maintenance of Records) Amendment Rules, 2024, Rule 9: -
  - (1A) every reporting entity shall, within ten days after the commencement of an account-based relationship with a client, file an electronic copy of the client's KYC records with the Central KYC Records Registry.
  - (1B) The Central KYC Records Registry shall process the KYC records received from a reporting entity for de-duplicating and issue a KYC Identifier for each client to the reporting entity, which shall communicate the KYC Identifier in writing to the client.

(1C) For the purpose of verification of identity of a client, under clause (a) and (b) of sub rule (1) or on-going due diligence as per clause (iii) of sub-rule (12), the reporting entity shall seek the KYC Identifier from the client or retrieve the KYC Identifier, if available, from the Central KYC Records Registry and proceed to obtain KYC records online by using such KYC Identifier and shall not require a client to submit the same KYC records or information or any other additional identification documents or details, unless –

- (a) there is a change in the information of the client as existing in the records of Central KYC Records Registry; or
- (b) the KYC record or information retrieved is incomplete or is not as per the current applicable KYC norms prescribed by the respective regulator; or
- (c) the validity period of the downloaded documents has lapsed; or
- (d) the reporting entity considers it necessary in order to verify the identity or address (including current address) of the client as per the guidelines issued by the regulator under sub-rule (14), or to perform enhanced due diligence or to build an appropriate risk profile of the client.

(1D) A reporting entity after obtaining additional or updated information from a client under sub-rule (1C), shall within seven days or within such period as may be notified by the Central Government furnish the updated information to the Central KYC Records Registry which shall update the existing KYC records of the client and Central KYC Records Registry shall thereafter inform electronically all reporting entities who have dealt with the concerned client regarding updation of KYC record of the said client.

(1E) The reporting entity which performed the last KYC verification or sent updated information in respect of a client shall be responsible for verifying the authenticity of the identity or address of the client.

(1F) A reporting entity shall not use the KYC records of a client obtained from the Central KYC Records Registry for purposes other than verifying the identity or address of the client and shall not transfer KYC records or any information contained therein to any third party unless authorized to do so by the client or by the Regulator or by the Director;

(1G) The regulator shall issue guidelines to ensure that the Central KYC records are accessible to the reporting entities in real time.

(1H) If an update in the KYC record of an existing client is informed by the Central KYC Records Registry to a reporting entity under sub-rule (1D), the reporting entity shall retrieve the updated KYC records from the Central KYC Records Registry and update the KYC record maintained by the reporting entity as per the guidelines issued by the regulator under sub-rule (14) and under clause (g) of sub- rule (2) of rule 9A.

## V. Operating Guidelines to the Reporting Entities

---

- A. Central KYC Records Registry application can be accessed by registered/authorized institutions or other notified institutions under the Prevention of Money Laundering Act or rules framed by the Government of India or any Regulator (RBI, SEBI, IRDA, PFRDA and **IFSCA**) thereunder.
- B. Every reporting entity has to register itself on the Central KYC Records Registry portal (<https://www.ckycindia.in>) with 2 Primary Users (Institutional Admins (IA users)) who in turn can create more users (makers and checkers).

### A. Registration

---

Registration process entails the following:

- i. Entry of the requisite details on the registration screen by the Nodal Officer/Authorized Signatory of the reporting entity and online submission of the same.
- ii. Upon submission, a reference ID and filled application form (system generated pdf) will be emailed to the registered email id.
- iii. The following supporting documents shall be sent to Central KYC Records Registry, CERSAI.

- Duly Signed institution registration form
  - Regulator License/Certificate/Notification
  - PAN Card of the Entity
  - Corporate Identification Number (in case regulator issues multiple licenses to an entity)
  - Registration Certificate (In case of Co-operative Banks/societies)
  - Authorization letter by Competent Authority for Admin users (should be signed by the authorized signatory/nodal officer etc.)
  - Certified copy of photo identity card of the admin users issued by the institution
  - Certified copy of the proof of the identity of the admin users issued by the institution (in case photo ids are not issued by the institution to employees, a letter duly signed by the authorized signatory mentioning the same would be required along with the photographs of the admin users)
- iv. The documents will be verified by CERSAI and shall accordingly be approved/rejected/put on hold.
  - v. Post successful completion of the document verification stage, the reporting entity shall have to register on the testing portal. Documents do not need to be submitted for the testbed registration.
  - vi. Post verification of the testbed registration request, the testbed login credentials will be sent to the registered email ids.
  - vii. The reporting entity shall then submit the testing checklist online on the testing portal. The checklist shall be verified, and testing completion approval mail shall be sent to the institution's registered email id.
  - viii. The final approval of the live registration request shall be provided, and the live login credentials will be provided to the users on their registered email.

The process flow for financial institution registration has been illustrated below:

## Access hierarchy:

---

The institutional admins shall create at least one region and branch for the purpose of user management and KYC Upload and Update. The Admin / Co-admin users of the reporting entities may create Maker/Checker users as per their requirement. There are three levels of users:

- Institution
  - Admin
  - User
- Region
  - Admin
  - User
- Branch
  - Admin
  - User

All activities e.g. creation/deactivation of users, creation/updation of KYC records, fee payments etc. require Maker-Checker process.

## Digital Signature:

---

- a) Every reporting entity can have access to the CKYCRR portal through digital signature.
- b) Digital signature issued should match the username as mentioned at the time of user creation.
- c) Digital signature is validated each time login is attempted.
- d) Type of Digital Signature required is Class II or Class III.

## Modes of Access

---

Reporting entities can connect with CKYCRR through the following modes of access:

1. Web based application

2. Application Programming Interface (API)
3. Secure FileTransfer Protocol (SFTP)

#### API Access

Institutional admins can enable CKYCRR API access through the application itself. Reporting entities may use the Search and Download API services to integrate CKYCRR into their onboarding journeys, especially in their digital channels, at the POS / branches, etc.

The API specification and integration process documents are published under the Downloads section of the website.

#### **SFTP Access:**

4. SFTP access is provided to reporting entities to upload/download bulk files over a secure connection. Reporting entities may send the application form in the format prescribed under the Downloads section available at our website [www.ckycindia.in](http://www.ckycindia.in) to CKYC helpdesk to enable SFTP access.
5. The SFTP specifications and integration process documents are published under Download section of the website.

## B. Upload of KYC Record

---

- a) The data captured as per the common KYC template is to be uploaded on the Central KYC portal along with the scanned copy of the supporting documents (PoI/PoA) within the timelines prescribed in the Prevention of Money-Laundering (Maintenance of Records) Rules, 2005. For an individual record, the photograph is to be cropped separately and uploaded. Uploading of cropped signature is optional.
- b) The specifications for scanning the supporting documents and photograph are stated below:
  1. Document should be scanned with a resolution of 150-200 DPI.
  2. Photograph must be passport size, in colour.

3. Dimensions of the photograph - 200 x 230 pixels.
4. Maximum size of photograph permitted is 100kb.
5. File size (Maximum Limit): 350kb for individual KYC record and 5Mb for legal entity KYC record.
6. Acceptable file formats are '.tif', '.tiff', '.pdf', '.jpeg', '.jpg'.

To ensure that the quality of images in CKYCRR are of a high standard, reporting entities are to ensure that only scanned images of the original photograph and OVD documents are uploaded to CKYCRR.

These guidelines are also communicated under the 'Notification' tab on CKYC portal [Scanning of photograph and OVDs to be uploaded on CKYCR Registry](#).

- c) The reporting entity can bulk upload the KYC details and scanned images. Images for each record will be required to be zipped separately.
- d) The entity should ensure adequate internet bandwidth for bulk upload. Bulk upload is provided via SFTP. For bulk upload of size less than 20 MB the Central KYC front-end application may also be used. Based on validations, a response file will be generated. This file will contain the success records, error records and download records. The response file is available for download from the Central KYC application.

## C. Search and download of KYC record

---

- a) Reporting entity shall search for the record by entering CKYC identifier or by entering a valid ID type and number. For better search results, REs should follow search on multiple parameters as explained at Search and Download steps at page nos. 5-6.
- b) Reporting entity can download individual / bulk records by entering CKYC identifier along with an authentication factor.

Authentication factors for download of Individual and Legal Entity KYC records are stated below:

**For Individual Records:**

| Authentication Factor   | Mode of Download             |
|-------------------------|------------------------------|
| Mobile Number           | Web screen / API / Bulk file |
| Date of Birth           | Bulk file                    |
| Pincode + Year of Birth |                              |
| Email ID                |                              |
| Pincode                 |                              |

**For Legal Entity Records:**

| Authentication Factor         | Mode of Download             |
|-------------------------------|------------------------------|
| Date of Incorporation         | Web screen / API / Bulk file |
| Mobile 1 / Mobile 2           |                              |
| Email 1 / Email 2             |                              |
| Pincode (registered or local) |                              |

c) **OTP-Based Consent for Individual Record Downloads:**

When an individual's KYC record is fetched from CKYCRR via API or screen-based interface for establishing an account-based engagement, CKYCRR will trigger an OTP to the mobile number registered in the KYC record. The reporting entity shall collect this OTP and submit it to CKYCRR for validation. The KYC record is provided in the download response only upon successful validation of the OTP. Reporting entity shall obtain download consent from the customer every time the CKYC record is being downloaded from Central KYC Records Registry. This consent form shall be retained with the reporting entity.

Refer to [Download Consent Notification](#) link under the 'Notification' tab of Central KYC Records Registry portal for Download Consent format.

CKYCRR sends an SMS notification to the client whenever their KYC record is fetched by a reporting entity.

## D. Update of KYC record

---

In case of change of existing KYC details information of a customer (including minor turning major) or receiving additional KYC information, a reporting entity will update the KYC record in CKYCRR within the timelines prescribed by the Prevention of Money-Laundering (Maintenance of Records) Rules, 2005.

- a) The updated data along with the scanned copy of the supporting document, where required, will be uploaded on the Central KYC Records Registry portal.
- b) In order to initiate an updation request, the reporting entity will need to have the latest KYC record of the customer.
- c) On updation of a KYC record at the Central KYC Records Registry, all linked entities (institutions that have either uploaded or downloaded the KYC record for that particular KYC record), will receive an electronic update notification of KYC record. The entities can download the last updated record of the customer and update/augment the KYC data in their systems.

## E. Processing of Records at Central KYC Records Registry

---

**De-duplication:** The KYC data uploaded on the Central KYC Records Registry will go through de-duplication process on the basis of the demographics and identity details submitted. The de-dupe process uses normalizer algorithm and custom Indian language phonetics.

- Where an exact match exists for the KYC data uploaded, the reporting entity will be provided with the KYC identifier for downloading the KYC record.
- Where a probable match exists for the KYC data uploaded, the record will be flagged for reconciliation and necessary decision by the reporting entity.

## F. Reconciliation of Probable match:

---

- i. Central KYC Records Registry will provide the probable match cases to the reporting entities for reconciliation and resolution.
- ii. Where the reporting entity confirms the KYC record as an exact match, it will need to download the existing KYC record of the customer.
- iii. Where the reporting entity confirms the KYC record as a 'no match', it shall be forwarded for processing and a unique KYC identifier will be generated for the record.
- iv. The reporting entity will have to resolve the probable matches within **10 days**, beyond which the record will be withdrawn by the Central KYC Records Registry. However, the same can be uploaded as a new record, if 'no match' is found.

The reporting entity is required to sensitize their staff to meticulously follow the guidelines issued to avoid action under the CKYC guidelines of their respective organisation and have accountability policy in place in this regard.

## G. KYC Identifier

---

- a) A 14-digit unique KYC identifier will be generated for new customer records and notified to the reporting entity.
- b) For "Small Accounts" the KYC identifier will additionally have a prefix "S".
- c) For "Simplified Measures Accounts" the KYC identifier will additionally have a prefix "L".
- d) For "OTP based E-KYC Accounts" the KYC identifier will additionally have a prefix "O".
- e) For "Minor Accounts" the KYC Identifier will additionally have a prefix "M".

The reporting entity may display the CKYC identifier of the customer in the mobile

banking app & internet applications and printing of the same in passbook, account statement, policies etc. (with masking) to create awareness among customers regarding CKYC. The Reporting Entity may also display banners in their offices/branches/[ATM](#)/website to create awareness among the staff as well as customers.

To download the format of CKYC banner, refer [Creating awareness regarding CKYCR](#) link under the Communiques' tab of Central KYC Records Registry portal.

## H.Fees

---

- a) Reporting entities can avail services of Central KYC Records Registry on payment of prescribed fee, in advance.
- b) Reporting entities will be charged only for download transactions, while uploads and updates are incentivized. This structure applies to both individual and legal entity records. CKYCRR 'Fee Structure' document, detailing applicable charges and incentives, is available in the Download section of the website. Search transactions are free of charge.
- c) For each download transaction, the corresponding amount shall be deducted from the advance payment made by the reporting entity. In the event of insufficient balance, the entity will be unable to access the services until the account is replenished. To initiate the advance payment, the reporting entity must generate a proforma invoice through the Central KYC application and remit the payment via NEFT/RTGS to Virtual Account Number assigned to the entity at the time of registration.
- d) The wallet balance will be updated, and a payment receipt will be generated once the payment is linked to the proforma invoice. TDS at the prevalent rates will be applicable. Reporting entity will be intimated when the balance goes below the prescribed limit set by them. The tax invoice for the services

utilized during the month will be generated and provided by the fifth day of the next month.

- e) For claiming incentives, reporting entities are advised to register their bank account details and submit monthly invoices through the 'Bank Account Details' and 'Incentive Invoices' options available within the Billing Management module. Detailed instructions for this process are provided in the Billing Management section of the User Manual which can be accessed from the Downloads section of the CKYC website. Additionally, the procedure for claiming incentives related to Upload and Update transactions is outlined under the Communiques section on the website. REs are requested to ensure timely submission of invoices and accurate registration of bank account details to facilitate smooth and efficient processing of incentive payments.

## VI. Reports

---

Central KYC application shall provide reports including dashboards, access trail and audit trail.

| Administration                                                                                                                         | Operational                                                                                                         | Accounts                                                                                |

### 1. Log Report

Log report provides the details of the users of the reporting entity who have logged into the Central KYC application, for a specified period of time.

### 2. Access Trail

Access trail report provides an admin user, the pages accessed by the users created under his hierarchy on the Central KYC application.

### **3. User Master**

User Master provides the details of the users under the reporting entity for the purposes of accessing Central KYC application.

### **4. Bulk Upload**

Using this report, admin user can view the status along with the count of records for each uploaded batch.

### **5. Dashboard**

Institution Admin User can view the summary of all uploaded KYC records for a specified time period.

### **6. Update Notification**

This report provides the notifications for the updates done on a KYC record that is linked to the reporting entity, for a specified time period.

### **7. Ledger**

This provides the summary of the payments made and utilised for the transactions on the Central KYC Records Registry.

### **8. Funds Usage Statement**

This provides a detailed statement of the opening balance, payments made, TDS released, usage and closing balance for a particular month.

## **VII. Retention of Records**

---

Central KYC Records Registry shall ensure retention of the Know Your Customer (KYC) records in an electronic format for a period specified by the rules and shall ensure that the retrieval of the information is facilitated within the stipulated time period.

## VIII. Methods to fetch CKYC card for customers

---

**Option 1:** Customers can give a missed call to 7799022129 to retrieve their CKYC card. If the card cannot be fetched in this manner, they may use the alternative methods listed below.

**Option 2:** Customers can obtain their CKYC card by verifying their mobile number through the link: <https://www.ckycindia.in/kyc/getkyccard>. A download link for the CKYC card will be sent via SMS to the mobile number registered with CKYC.

**Option 3:** Customers can also fetch their CKYC card through DigiLocker.

## IX. Grievance Redressal Mechanism

---

Central KYC Records Registry shall provide for the grievances of reporting entities to be redressed in a timely and appropriate manner and ensure records are maintained for such resolution.

Matter can be escalated to the next level only when it is not responded /resolved within the stipulated timelines by the officials at where it is raised.
